SolarOne & PowerOne

Heirs of the "Opera Only" proud tradition, they still preserve all the sophisticated technology, it can finally be conceived as an excellent partner for a music playback of high quality and come into the more sophisticated listening rooms of the passionate lovers of the most high-end. Unlike the huge, exclusive and binding creations produced till now, "SolarOne" and "PowerOne" can safely go into the living rooms of our homes! In "Solar One" the particular solar power supply is totally separate from the traditional power supply: in fact, the distribution network is one of the great problem because of the enormous amount of inconvenience which inevitably corrupt the integrity of music signal. It is unique for its incredible reserve of power: its simplicity and its facility impulse will surely impress you. The attainment of the highest quality has always been our goal: with these products it is achieved not only in innovation, class, design and originality, but also in normal use by the sophisticated music lover.

inside view PoweOne

"SolarOne" is the unique amplifier in the world completely Solar Power Supply and absent from electromagnetic emissions. It uses 4 black solar panel cells.

"PowerOne" differs from all other audio amplifiers using a power supply with 4 phases that guarantees a durable system never seen before.

This state of the Art Amp features 4 x 300 watt triple-insulated toroidal transformers(only "PowerOne"), 42 high current bipolar transistors, 2 analog input (RCA/XLR), 2 output channels with 8 speakON connections. The specs show output configurations of 2 x 300 or 1 x 600 watt rms at 8 ohm class A).

"SolarOne" and "PowerOne" is available in 2 different versions(only one to battery power), both in terms of size and performance, assembled to order and lifetime warranty against failures arising through faulty workmanship and materials.
